RE: Letter of Reference

Scott,

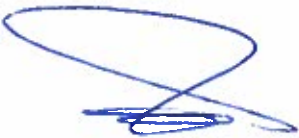

Thank you for visiting our office in December of 2018, and then again for two days this past week.

On your first trip you provided a two day basic training to about 15 of our Eastern office project coordinators and estimators. On this latest trip you returned to provide a more advanced training on subjects not really covered last month, to a similarly sized group.

We enjoyed having you at our office and learned a great deal from you on both trips. It was very beneficial to have you back to dive deeper into some of the functions that were not covered in the basic training. I feel that we are poised to be very productive thanks to your help.

Again, thank you for bringing your "real world" experience to these sessions and please do not hesitate to provide my contact information to any potential clients. I look forward to possible future trainings from you for our staff.

Sincerely,

Behzad Fakhrajahani, P.Eng.  
Chief Estimator  
DRAGADOS, Eastern Canada
